

Colortrac Software Dongles

The following products require a USB dongle to operate.

- SmartWorks Pro
- SmartWorks EZ Touch+
- ScanWorks
- CopyWorks

Colortrac no longer offer replacements for lost or 'not working' dongles. The free software associated with your scanner model is available to download.

EZ Touch+ will operate as EZ Touch without a dongle.

The most common cause of a dongle 'not working' is when the customer has moved to a new PC or updated the OS on their existing PC. The correct HASP must be installed on the customer's PC.

Please refer to dongle manufacturer's website for known issues:

SmartWorks Imaging does not require a dongle. It is a licensed product. This software is for use on Win10/Win11 64bit PC only with SG/SGi and SCXpress/SCi only. It does not work with SC or earlier models.
