

August 2017

Dear Distributor,

Colortrac ceased volume manufacture and sales of the Colortrac SmartLF Gx+T56 (2011) in August 2017 and therefore this scanner range will be end-of-life (no longer supported) after 31st July 2022.

This letter provides advanced notice of this change in status.

Should we receive requests for *support* from the field for this product after the above date, your Colortrac Sales Manager can discuss with you what alternative options might be available to provide a solution.

To clarify:

Manufacture of the earlier non-2011 SmartLF Gx+56 (non-Thick media) & Gx+T56 (Thick media) models ceased in July 2011. These went end-of-life as of 30th June 2016. Parts exclusive to these models are no longer available.

Thank you and best regards

Colortrac Support
