*               SmartLFSC firmware release v2.02         *
***************************************************************

For SC scanners fitted with Energy Star electronics only.

Enhancements for improved image quality
Scanner ejects loaded paper before entering sleep mode

COLORTRAC                                   NOVEMBER 2014
Release Notes

***************************************************************
*               SmartLFSC firmware release v2.00         *
***************************************************************

Changes for Energy Star board.  This f/w must NOT be used
with SC scanners fitted with non-Energy Star electronics.
Scanners fitted with Energy Star electronics can be identified
externally by the blue Energy Star badge on the right-hand
side of the scanner lid.  SC scanners with Energy Star electronics
made after Nov 2014 are compatible with this release.

COLORTRAC
